DEDICATED TO CHARLES PRATT
SECRETARY OF SCHOOL

OUR FOUNDER'S PLAN

By Thomas Beaghen, Jr., I. M. E., 1902

There's an Institute in Brooklyn,
Where a fellow who has the "grit,"
Can acquire an education
That technically makes him "fit"
To solve Industrial Problems,
And successfully compete
In occupations which require
An engineering "feat";

As the Founder of Pratt Institute had planned that it
should be.

It's a place where, opportunely,
Only *best* is allowed full sway,
And the student who will give it
Will proudly recall the day
When he entered at Pratt Institute,
To be trained by men so fine,
Who helped to build his character
And to get his mind "in line";

As the Founder of Pratt Institute had planned that it
should be.

While progressing in his studies
In this Institute, truly grand,
He is taught how to "apply" himself
With his body, mind and hand,
In Foundry, Machine and Pattern Shop,
In the Drafting Room as well,
In Chemistry and Physics Lab,
And in subjects "time will tell";

As the Founder of Pratt Institute had planned that it
should be.

The Mathematics that he learns
From methods, in "Marsh's way,"
Will be grounded in his memory
And will always with him "stay";
And with Kottcamp's Strength of Materials
Will be put to use some day,
In life's unceasing battle
In which there is little "play";

As the Founder of Pratt Institute had planned that it
should be.

Besides this wealth of knowledge
That will filter through his brain,
There are other golden "nuggets"
That he surely will obtain,
In systematic habits
He will form quite unaware,
As he works with regularity
For life's duties to prepare;

As the Founder of Pratt Institute had planned that it
should be.

Genuine pride will be his portion
As he graduates from Pratt,
The confident and manly kind
That doesn't "enlarge his hat."
For he's "just as good" as "the best of them";
No matter where they're "cast";
Resourceful, skilled and accurate,
He will never be outclassed;

As the Founder of Pratt Institute had planned that it
should be.

We'll be glad to be called "Old Timers,"
Or worthy "Prattonian Sons,"
And we'll long to repeat the experience
Of good old Pratt days that have gone.
"Two years' hard work" will be treasured
And the friendships we formed from that;
But our gratitude cannot be measured
As we count what we gained at "Pratt."

The Surest Way

The common daily tasks of life
Seem poor and mean and small,
And oft we scorn them to respond
To some alluring call.

The tasks that lie so close at hand
Grow irksome to the soul
And are forsaken for some dream,
Some visionary goal.

And yet the surest road to fame,
To deeds that stir and thrill,
Is doing the tasks that lie at hand
With all our strength and will.

SAYINGS AND MAXIMS OF CHARLES PRATT

The base cornerstone of our ideal temple of learning is that everything connected with the organization must be genuine and true and nothing done for effect.

We believe the objective thing in education is to learn the power of attention and industry—the value of promptness in beginning work; method, accuracy and dispatch in doing it, perseverance and courage before difficulties; self-control, self-denial and temperance.

Be modest; learn to be a good listener. Fix upon a few principles which from the days of Moses to this day have been proven to be sound, and with the courage bred of faith in the principles you have established as the maxims of your life, go out to fill your place.

SCIENCE AND TECHNOLOGY

In the field of higher education, the essential feature differentiating the School of Science and Technology from the engineering college is economy of the student's time and money, which we make a vital and determining consideration. We employ two-year, intensive, strictly technical courses of utmost efficiency to serve those unable or unwilling to devote the great amount of time and money required for a college course. Thus we bring our educational service within the reach of many who otherwise would have no alternative but to carry throughout their working lives the serious handicap which lack of education imposes upon those who follow callings in which a thorough training in industrial technology is a necessary qualification. This consideration was clearly dominant in the purpose of the Founder of Pratt Institute, who believed that it could not be met through the conventional college plan, but demanded a special type of course.

NEW S & T GATE

INDUSTRIAL MECHANICAL ENGINEERING, 1926

THE history of the mechanical class, although brief, has been none the less, eventful. It is now finished and as we look back over our two years of close and intimate association no doubt many a breath of relief will be drawn by those to whom the life at Pratt has been rather strenuous.

We all have been brought to feel that the end of our school life will mean but the opening of a larger field of endeavor in which, by the long suffering, patience, and perseverance of the faculty, we may be able to labor with some measure of success.

To those unacquainted with the work of the S. & T. school and lest we ourselves forget—but who could—we must mention Mr. Marsh. His philosophy and keen sense of humor, which lightened many an hour of math, to say nothing of his unique though well proven methods of obtaining action from those susceptible to the charms of Morpheus, all form a background from which his personality stands out but clearer.

It might be well to mention, though it would be impossible to recount here, the many ways by which every member of the faculty from that first memorable day to the last have shown their interest and good-will toward us. Such things as these can hardly be repaid except as we may express our appreciation here.

The kaleidoscope of life changes quickly and now with but these many memories and with sincere regret at leaving the scene of so many and varied experiences we look forward with no little anticipation to the greatest adventure of all—that of living not only for ourselves alone but to enjoy our lives to the fullest extent by putting in practice those ideals which have been before us here.

Class Baseball '25-'26

Interclass Bowling Mgr. '26

The Frankie Frisch of the I. M. E. '26 baseball team. Ed is a good, hard worker and is sure to get there.

BELLINGHAM, ANDREW S.
416 Grove St., Newark, N. J.

Andy

Class Representative to Neighborhood Assn.

Crown and Spade Club

There is perhaps no harder plugger in the class than Andy. We have always found his company pleasant as he tempers his work with some of his Scotch wit.

BENNETT, EDWIN ALFRED
1147 Southern Boulevard, Bronx, N. Y. C.

Ed

The "big brute" was amused when called a commuter. You see, he traveled from the Bronx every day. He was Mech. Lab. speed king. His neatly "engraved" reports were always in on the day following the experiment.

BRONK, GEORGE R. *Slip Stick Artist*
291 Clinton Ave., Brooklyn, N. Y.

One of our most enterprising members. We will long remember his well-known song entitled, "The Late Twins."

BROWER, JOHN B. *Pep—Pepper*
Harriman, N. Y.

The busy bee makes a noise,
As it improves each shining hour;
The silent ant just plugs along
But gets there—so does Brower!

BRYANT, JOHN G.
40 John St., Kingston, Pa.

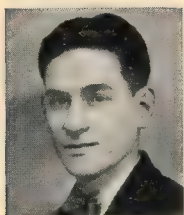

Bowler '25-'26
Class Baseball Manager '25

A shining light as a bowler and a baseball manager of rare ability. Always smiling and known throughout the school as J. G. His intimate friends were a large herd, and his enemies infinitesimals.

BUTLER, JOSEPH P.
23 Wall St., Waterbury, Conn.

We know him as Butts. He is "les Enfant" of the Waterbury contingent. Has a nature that seems to travel along the sane, quiet, happy path.

CALLANAN, TIMOTHY J. *Ted*
300 Willow St., Waterbury, Conn.

The song bird of the class, he knows every popular song hit from 1492 to the present date. We haven't seen him mad once during his two years' stay with us.

CAMPBELL, GEORGE J. *Soup—Eight Dollars*
11 Alpine St., Irvington, N. J.

Neighborhood Association.
Class Treasurer '25-'26 Varsity Tennis '26
Basketball '25-'26 Pool '25-'26
Captain '25 Track '25-'26
Tennis '25, Capt. Crown and Spade Club

Although no one could stump him in math, mechanics or electricity, he found time for sports, and could appreciate the charms of the Art School.

CHIDESTER, GEORGE A. *Sheeny*
540 Prospect St., Hudson, N. Y.

Class Basketball
Class Bowling

DANIELSON, ERWIN

Danny

78 Maple Hill Ave., New Britain, Conn.

Prattonia Board

Nutmeg Club

We often wondered why Hartford was the Capitol of Connecticut, but now we know. It's because such capital fellows as Danny come from there. Danny always wears a smile and has a winning way with the Institute girls. He is a class worker who lends his hand willingly at all times.

DONOHUE, PAUL

99 North 22nd St., East Orange, N. J.

Class Representative of Prattonia 1925

Literary Editor 1926

President I. M. E. A. 1926

A fine fellow and keen student. Does things in a quiet, dependable way. Paul is bound to reach the top in whatever he undertakes.

DOVE, THEODORE

Teddy

163 Meadow St., Naugatuck, Conn.

New England Club

Intends to use his engineering ability designing a concrete dam in the Naugatuck River. The principal reason of the project is to catch gold fish coming down from Waterbury. You're all right, Ted!

DOWNEY, JAMES F.

Chic

HUBER, E. WILLIAM
237 Main St., Ridgefield Park, N. J.

In years to come our thoughts of "Bill" will bring back again the pleasant hours that we spent together. He always has a cheerful word, a smile or perhaps a little fun but behind that smile or fun stands determination, character and ability.

Here is our first mate of the good ship "Mechanical," which he has helped guide safely back to port without great difficulty. He is a whiz on the alleys, and liked by all.

LERNER, P. A.

167 Dumont Ave., Brooklyn, N. Y.

"Rabi's" pal. His interest in his work is shown by his numerous questions. Lerner is a good hard worker, and we are sure he'll make the grade.

LESSWING, EDMUND W. O.
Buffalo, N. Y.

Bowling '24-'25-'26

Grade "A" and a whiz in machine shop. Lesswing had a little lamb, it was from Pennsylvania, though, and everywhere that Lesswing went, Guelcher was sure to go.

MCDONOUGH, JOHN F. *Mack*

Mac "silent but forceful," a clean athlete and as good a sport as ever came to Pratt. His only fault was that the train never beat the boat!

MEHRTENS, JOHN J.
175 44th St., Edgemere, L. I., N. Y.

One of our recruits from the Class of '25. John is a cheerful, good-natured chap, but he can be serious too, when occasion demands.

MICHALAK, CHESTER *Mike*
513—51st St., Brooklyn, N. Y.

A quiet, unassuming fellow, Mike is always on the job and ready to help.

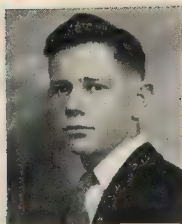

MULLER, FREDERICK L. *Fritz*
27 Moffatt Ave., Trenton, N. J.

He only is a well-made man who has determination. While most of us are ready to quit school, "Fritz" says Cornell with an M. E. at the end. A hard worker who is willing to lend a hand at anything.

MUSTO, JOHN *Musty*
268 Baldwin St., Waterbury, Conn.

Neat and tidy Musty, whose loose but forceful tongue slipped, as it did at times, just to show he was around. Ambition is his middle name. We know he'll make the grade.

NIELSEN, LAURTIS
48 Johnson St., Westfield, N. J.

The boy statistician who knows his tomatoes without any ketchup. A Jerseyite we are all proud of,—what's the nicest place in the world, Nielsen?

O'BRIEN, EDWARD J. *Obie*
133 Norwood Ave., Brooklyn, N. Y.
Crown and Spade Club
Water Polo '26

The fellow we all like, with the biggest, jolliest laugh among us. Deserves honorable mention for surviving numerous attacks upon his luxuriant and beautiful mustache.

Varsity Baseball

Just look in the varsity athletic rack when he stepped to the bat mid cheer after cheer. The ball hit the ozone the fence to clear, but this wasn't all as we recall, down to 266, the "Old Study Hall," he was one of the three musketeers of that well-known year '26, we hear.

O'SHEA, JOHN J., JR.
551 Lexington Ave., Brooklyn, N. Y.

He is small in stature, but his capacity is enormous. A trifle eccentric at times, but this is more than over-balanced when he is feeling right. He is a broad-minded thinker and decidedly optimistic in his views.

OWENS, T. D.
592 Sterling Pl., Brooklyn, N. Y.

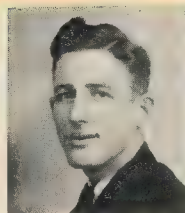

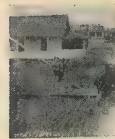

Tommy

Big, good-hearted Tom of mechanical fame, we don't care from whence you came. You helped us with problems in the shop, we know your climb to the top will be mile by mile, accompanied by a faithful pipe and the hearty P. I. smile.

RABINOVITCH, HERSH
122 West 114th St., New York City

MATH PRISONER'S SONG

Oh, I wish I had Cap I to love me,
Cap I to call me his own;
Oh, I wish I had Cap I to live with,
'Cause I'm tired of doing Math alone.

Please meet me to-night in my study room,
Please meet me to-night all alone,
For I have a work-book to show you,
It's a work-book that's never been shown.

If I had a ship on the ocean,
All mounted in silver and gold,
Before I'd choose Math as a hobby,
That ship would be anchored and sold.

INDUSTRIAL MECHANICAL ENGINEERING, 1927

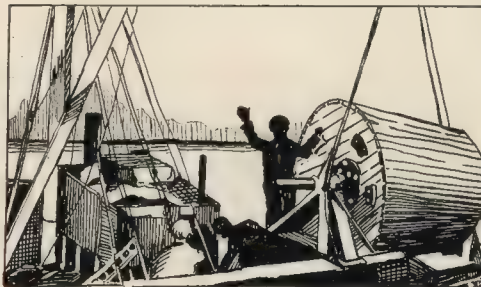

TIME is a peculiar thing. It moves on with startling regularity, and yet it sometimes drags. Then again—well will some one kindly tell us where the last eight months have gone to? It seems as if it were but yesterday when we arrived at the Men's Club, parked our luggage, and started out to find a suitable place of abode.

We were all strangers, but it was not long until we were merged into one happy family, with the spirit of helpfulness prevailing.

The wood shop was a scene of honest endeavor and "plane" talk. At mechanical drawing we were naturally not the best in the world. The best die young. We expect to live to a ripe old age. We pleased ourselves and amused our instructors. Descriptive geometry was our favorite pastime, as it taught us to think. The more Descript, the more think. But after studying Descript, Oh! Math, where is thy sting? The introduction of Mr. Geo. Metry, (of parts unknown) was hailed with misgivings by all of us. In the Mech. Lab. perpetual motion was in a high state of perfection—rewriting lab reports, commonly known as boomerangs, since they always return.

INDUSTRIAL MECHANICAL ENGINEERING ASSOCIATION

THE Industrial Mechanical Engineering Association had its inception six years before the Class of 1926 undertook to guide its destiny and add another successful year to its already brilliant career. This we believe we have done with the able assistance and guidance of our Honorary President, Mr. Harper and our Faculty Advisor, Mr. Dale.

The first shot was fired by Mr. Harper in the form of an impromptu address at the first meeting. Mr. Dale, in a short address, reiterated what had been said by citing instances which had come in his long association with men of the engineering profession.

At each subsequent meeting three or four papers were presented, covering a wide variety of subjects. Moving picture films were shown from time to time, accompanied by lecturers. Trips were made to the Hudson Avenue Plant of the Brooklyn Edison Co., the Brooklyn Navy Yard, the Singer Sewing Machine Co., the Bethlehem Steel Co., the Atlas Cement Co., and the International Motor Co.

By this performance we believe we have upheld the traditions of the society and so pass along an unblemished reputation to the Class of 1927 who, we feel confident, will do as well or better than ourselves. To those who have given us their loyal support and co-operation, those men who prepared and presented papers, to our Honorary President and our Faculty Advisor, to Mr. Ernest Hartford, Secretary of the Committee on Relations with Colleges of the A. S. M. E., and to the officers of the Society we sincerely and humbly offer our thanks.

President, PAUL DONOHUE

THE PRATT PARK

INDUSTRIAL ELECTRICAL ENGINEERING, 1926

*And like some low and mournful spell,
To whisper but one word—farewell! —Park Benjamin.*

LOATH we are, reluctant to leave the scenes of jolly companionship and earnest endeavor. Yet, we are now about to seek new fields for our newly acquired knowledge, to seek real problems of industry so that we may progress toward a higher goal and not become mired in the slough of inactivity and indulgence.

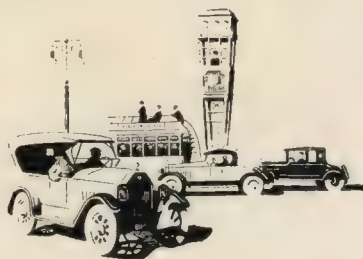

Our sojourn at Pratt has proven most beneficial if we have exerted our utmost effort to follow the advice and instructions of the faculty. The patient, sincere and capable efforts of our instructors to impart to us the mysteries of engineering subjects has furnished an admirable example for us in our future relations with subordinates.

We feel equal to any occasion, for have we not wrestled with mechanics under the guidance of Mr. Baxley, who, when we failed in a solution, smiled and assigned a different problem? Have we not encountered the monster Calculus, and with the aid of Mr. Cowles, gained the secret of the centuries, that two can be proven equal to one? Have we not sought the root diameter of queer threads under the frank challenges of Mr. Burley? And last, but not least, haven't we become acquainted with the "simple matters" of electrical technology under the supervision of Mr. Cook?

When this class of '26 stands together for the last time, and slowly dissolves at the word of dismissal, each man will choose his direction and carry with him a love, which will be undiminished by time, for his Alma Mater, Prattonia.

THE PRATT PARK

INDUSTRIAL ELECTRICAL ENGINEERING, 1927

ALL hail to the Electrical Class of '27, destined to become the pride of the Institute! Individually, the class is progressing even beyond their officers' expectations; collectively, beyond the Institute's standard.

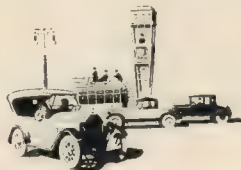

Mr. Isenberg is always the same. Smiling is his best accomplishment and therefore is a part of his daily instructions even on rainy days.

In the field of sport we have already distinguished ourselves. Our soccer team was particularly successful, going through the entire season without winning a game. However, we weren't poor sports enough to try to stop any other class from winning the championship. In almost the same manner we distinguished ourselves in basketball through no fault of our own, as we did our best at all times. A glance at the final results indicates how closely the First Year Electricals came to winning the track meet. Perhaps the best accomplishment of the season was the winning of the ten-pin championship; and to the hard efforts of the team we owe our victory.

We live in anticipation of our second year! If half the pleasure and experiences of our first year are revealed in our second, Pratt Institute will have lived up to its standard.

INDUSTRIAL ELECTRICAL ENGINEERING ASSOCIATION

SINCE the Pratt Institute Electrical Association was organized twenty-four years ago, it has grown continuously, and while it has done much to encourage research, it has done more to provide its members with practical training in giving clear, concise, descriptive talks, without which ability, advancement is difficult.

Previous to 1925 the work of the association had not been considered of sufficient importance to warrant time from the regular schedule for the holding of its meetings. During the last two years, however, one hour a week has been taken from the regular schedule for the giving of talks by the members. So successful has this plan proved that the organization now is in a most promising condition.

During the first year, only a few meetings of the Junior branch were called, but at these meetings the start was made for the coming year.

Throughout this entire year some thirty-odd weekly meetings were held, in addition to the regular monthly meetings which were addressed by some outside speaker actively engaged in the industry. An occasional motion picture descriptive of the electrical industry was shown, to which all S. and T. students were invited.

Perhaps in no other year have the members co-operated so whole-heartedly, or has the work been so pleasant. Much credit is due the program committee, Messrs. Gray, Lytle, Clark and Missemer.

INDUSTRIAL CHEMICAL ENGINEERING, 1926

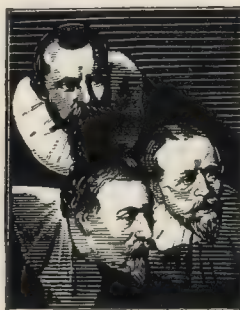

AS we approach the end of our term as Chemistry students at Pratt, we review the events of the last two years with the thought that one of the happiest periods of our lives is about to become a memory. When we came here in September of 1924 we knew nothing of our classmates or instructors. Now that our brief companionship is at an end, we realize what lasting friends we have made, both in the faculty and the student body.

When we returned for our second year's work we were greeted by Dr. Allen Rogers, our course supervisor. Our daily contact with him in Industrial and Organic Chemistry Classes brought us to a realization of the fact that here was a man such as one seldom has the good fortune to work with. Dr. Rogers was not merely our instructor; he was father to every one of us—ever tolerant of our mistakes; ever ready with a word of encouragement. Smiling Dr. Snell, our Tech Lab instructor, will linger in our minds as one of the most pleasant persons we have ever met. And last, but not least of our Chemistry Instructors, was Dr. Mantell, who showed us how to design chemical plants so that they would make money.

The time has come for us to say good-bye to our student days, those happy days at Pratt when we were just one big family, and for us to go forth to all parts of the world to make our way in industry. The time has come, but those days will always remain fresh in our memories, and the friendships we have built up shall endure.

Mac

After completing his work at R. M. C. of Canada, Mac decided he wanted some practical knowledge along the line of leather, so he entered Pratt. During his stay with us, we have found him to be a good student, a good mixer and a loyal friend.

INDUSTRIAL CHEMICAL ENGINEERING, 1927

N September 23, 1925, we of the I. Ch. E., '27, found ourselves dashing madly about the buildings in an endeavor to locate the different rooms.

Next we visited Mr. Ladner, the man who was to acquaint us with the mysteries of mathematics. Mr. Ladner has an amazing faculty for memorizing logarithms. This, in itself, is sufficient to arouse envy and admiration, but when we saw the ease with which he solved the most complex problem, our admiration knew no bounds.

We soon found out that Mr. Jones had charge of the forge shop. Here we donned the overalls and took up the hammer. No doubt we ruined more or less iron, but it was rather enjoyable, after all.

With Mr. Hempstead, our instructor in mechanical drawing, we spent many pleasant hours.

Later in the year we met Mr. Bivens, Mr. Weil and Mr. Van Gaasbeek. All proved excellent instructors, every man proficient in his particular line.

Still later we met Mr. Marsh, who took up the task of correcting our many faults in English. We soon found that Mr. Marsh was opposed to any imitations of saxaphones in his classroom.

When it came time to visit the foundry, we found Mr. Miller capable of instructing us in this branch of industry, assisted by Mr. John Brennan. Mr. Brennan is a staunch foe to shirkers, and for this very reason he found us somewhat troublesome.

We finally adjusted ourselves to the schedules furnished, and, so far, things have progressed satisfactorily; which is, "being interpreted"—satisfactory to us!

WOHLER CHEMICAL ASSOCIATION

HE WOHLER ASSOCIATION was formed in the fall of 1905 for the purpose of promoting a feeling of good fellowship among its members, of fostering class spirit, of providing an open forum for the discussion of educational topics, of enabling the students to come in contact with men who are specialists in the field, thereby broadening the student's viewpoint, and making him better acquainted with chemistry's place in the industries.

Chemistry men are particularly urged to join the society as a great deal may be learned by those attending the meetings. The speakers at these meetings are scientific men well posted in their particular field and qualified to deliver sound facts and knowledge to students who have not yet met with industrial problems and methods of application.

Foreigners' Night, on April 14, was a very interesting affair. The men in the class from far off countries like China, Norway, and Guiana, made summary speeches regarding the advantages of modern applications in industrial work over primitive methods. The men spoke from knowledge gained either from actual contact with the industries or from other sources; at any rate they brought out many interesting and surprising facts.

SCHOOL OF FINE AND APPLIED ARTS

The past year in the School of Fine and Applied Arts has been a most prosperous one. Never before have we had so many applications for day and evening classes and even now we realize that the number for the next school year is to be much greater for we have had in May a far greater number of applications for the entering classes than can possibly be accommodated and there are many coming in daily. The advanced classes have also been filled to their utmost capacity and the students are doing excellent work. The enrollment in the day classes has been 536, in the evening classes 730, and in the Saturday classes 325, a total of 1591.

Two of the finest and most significant features in the management and the development of the School is the organization known as The Artsmen, composed of the men of the school, and the organization known as The Paletteers, composed of the women of the school. These organizations have not only brought about a splendid spirit of unity and helpfulness, but they have also been instrumental in bringing to the school some of the best known illustrators and professional people.

ARCHITECTURE III, 1926

WE, the class of '26, entered Pratt Institute in the Fall of 1923 and we were given a cheerful welcome by Mr. Pope, who proceeded to instruct us in the fundamentals of Architecture, aided by Mr. Petersen in Free Hand Drawing, and Mr. Price in Mechanics. The year passed very quickly and in the following Fall we parted company; some to construction, under the efficient instruction of Mr. Edminster, and some to design under Mr. Gupstill.

In the Fall of 1925 the weary fourteen survivors of a class of forty, gathered in Room 41 and discussed the memories of the two years just passed. Five went into the design class and the rest passed into the construction room. Those studying design were introduced into the field of pencil and water color rendering by Mr. Gupstill, while Mr. Axt amazed them by such words as "projet," "entourage," etc. Thursday afternoons were spent in studying Interior Design under the instruction of Mr. Pratt.

In the Construction class Mr. Haugaard instructed the "boys" in Architectural detailing. He showed exceptional ability in keeping the class busy all week, although he came in only on Monday mornings.

Mr. Edminster relieved the monotony of the course by giving the problems in construction and Mr. Price by his explanation of the course in Mechanics, viz, What is it? How do you get it? and What do you do with it after you get it?

Now we of the class of 1926, on the eve of our graduation, look with a great measure of hope toward the future and will carry with us fond memories of our life at Pratt.

THE ROAD TO SUCCESS

It requires unfailing patience
And determination, too,
In spite of life's discouragements
To force one's pathway through.

A rose-strewn road is seldom
When success you keep in view;
Endurance conquers hardship—
Encouragement makes skies blue.

Provided work is pleasure,
Ev'n hard work that's yours to do;
Then pledge your loyal service,
And hope, triumphant, renew!

ARCHITECTURE II, 1927

BARRAGE of welcome followed by mutual felicitations all around greeted us students upon our return to our Alma Mater. Rallying from this astounding reception by the faculty, we were confronted with the task of choosing as our year's work either Architectural Engineering or Architectural Design.

From the very first day Mr. Price put in appearance, this room was the scene of much life and activity. His few (?) formulas and theories did much to brighten the days and were not without beneficial results.

As to our brethren, the design men, nothing was left undone to furnish them with work. Something doing every day for the entertainment of everyone was their program. Heading this were social functions galore, while the spare time was devoted to design and mathematics. Mr. Guptill instructed the boys very efficiently, in the act of paint-slinging and "throwing-up" perspectives.

A most lively time was had by all at the Architects' Dance, held in the Gymnasium, on Friday, November 13th. The first year men contributed more than their share in putting it over. In the field of athletics, we were well represented and the fellows certainly did their best to uphold the Architects' colors.

As this school year draws to a close, we shall all part to different fields of endeavor but we shall always hold in revered memory the familiar faces of those who diligently labored that we might achieve success in Architecture, the most difficult of the professions.

PRATT LIBRARY GATE

ARCHITECTURE I, 1928

LO the average person, September 28, 1925, was just a common ordinary day in the year, but the field of Architecture will soon claim it to be the most blessed day in history. That eventful day saw a group of forty or more young men, some fresh from the "sticks," others from the sidewalks of New York, gather at Pratt Institute with efforts to solve the problem of better architects with more play and less work.

It took Mr. Pope, our most efficient instructor, just about thirty minutes to convince us that in order to make good at Pratt, we must get down to real hard work. Our congenial friend and instructor, Mr. Bogart, taught us Math and English, as well as Astrology, Biology and even heart and home problems. Mr. Price, a regular fellow, spent many moments on points and laid much stress on mechanics in order to get a reaction. Mr. Peterson had a whole lot of time making artists of us. It would be quite impossible to forget the splendid assistance given by Mr. Mather and Mr. Munson.

Due to the fact that "Red" Nelson had such an innocent look, we elected him president. "Newt" Borgerson, the "here's your change kid," from the Men's Club, became vice-president. "Gates" had a pencil on his ear, so we made him secretary, and we caught "Don" Lewis when he wasn't telling a joke and wished the job of treasurer on him. Otherwise the class was all right!

The Architects more than held their own in athletics, being runner-up in soccer, basketball and bowling, as well as finishing favorably in the pool.

As a result of this mixture of work and play, mostly work, and the untiring efforts of our most efficient faculty, we can consider ourselves as having acquired a good firm foothold toward success in the field of Architecture.

STILL LIFE IN OILS

MISS ANNA S. FISHER

A. N. A.

GENERAL ART, 1926

AFTER three years of "hard labor," June, 1926, has finally arrived; a time of partings and farewells.

It is wonderful to think what some people, who already had a successful start in life, such as banana peddlers, poets, farmers, traveling salesmen, aviators, lumberjacks and the like, will give up to pursue an artistic life. To an insider it would seem in some instances that some of the certificates should have some appropriate wording in favor of a Charleston contest, sport debating, or voice culture.

As we look back over the years and see the improvement that took place in our work, the knowledge we acquired, the acquaintances and friendships we formed, we begin to believe that they were the three most pleasant years of our lives.

However, we sincerely believe we have what we came for, and have acquired the courage to go into the cruel world to do and dare for that subtle and elusive thing called Art.

Peace falls like veils upon my troubled heart
As lilac rain from out the heated sky—
My weary soul a-dwells on peaceful things;
Green leaves that rustle in the tender breeze,
Dappled with sunlight, and a greener shade
A turquoise wave that slips with languid grace
Along the glistening pebbles of some shore;
Candle-light, and love songs; old hands folded,
And grey-winged birds that twitter at the dawn.
From out the teeming turmoil of the day,
My heart is busy with its quietness.

GENERAL ART, 1927

LED by the stalwart gargantuan Mathews, this doughty little band of artists came to the door of Pratties' for a second year, undaunted by the explosions, tears and prayers to heaven on the part of the first year instructors. We were determined to master the problems of portraiture, life drawing and composition quite as gaily as we had conquered charcoal, pencil and water color. In spite of the loss of a few students to the normal and design classes, and the combining of the two first year groups, we moved along in our little orbit, enlivened by the daily witticisms of certain of the class "lights" and the friendly rivalry inspired by the women's presence.

The proximity to the worthwhile things is not overlooked and we find that New York represents other interests than night clubs and theatres; there are the museums, storehouses of the relics of bygone civilizations; exhibits of old masters and modern celebrities; there are docks and wharves, the rivers and the ocean, parks, architecture, scenery in all seasons that beggars description. All these contribute to the fund of knowledge we gain by immigrating to the melting pot of all the world. Here people of all nations and tongues, of all creeds and colors enroll in the cause of Art, and the race for fame and fortune is another test for the survival of the fittest.

GENERAL ART, 1928

ERE we are! The class of 1928! We came to Pratt Institute, armed, for the most part, with aspirations and a very strong desire to succeed. Whether we do succeed or not, time alone will tell.

When school opened, our honored elders gave a dance in our honor, as we will do next Fall. Not to be outdone, we returned the compliment. We have played, so say the third year folks, all the tricks, and have done all the senseless things that they did. We sincerely hope and trust that later we will be told that we have done as many praiseworthy things as they seem to be doing.

Our energetic presidents are forever after us, silencing, encouraging, and sometimes knocking. Our class treasurers and ticket representatives are also extremely active. We pin a medal on ourselves for donating and decorating a tree for the Salvation Army as our Christmas charity. We are not particularly displeased with ourselves, although we are not yet perfect, and hope that none of our elders and betters find us beyond hope.

So, on! We seek new fields to conquer, new libraries to make murals for, new Rockefellers to paint, and we trust that our P. I. will never be ashamed to own us.

GENERAL ART, 1928

ARTSMEN

ARTSMEN! A name to conjure with. A group of men whose association has in a few short years become a decided influence in the school, and whose achievements have been far-reaching; composed of the men students in the Art School.

Under its auspices lecturers are procured each year, men who are eminent in various branches of art. This year's speakers were Charles Chapman, Meade Schaeffer (a former student), and Matlock Price, all of whom are well known in varied capacities. The long hard road beset with failures fades away and the hope eternal springs anew under the inspiration of these stalwart men.

The Artsmen inaugurated, this year, the annual alumni exhibition. The people who came to see it were loud in their praise both for the exhibit itself and the way it was handled by the Artsmen.

The Artsmen Gypsy dance in the gymnasium was another of the brilliant and colorful events of the year.

Feats not generally considered part of an artist's activities, but add to the Artsmen laurels. The track meet was won by a large score by the Artsmen; the Chess and Checker tournament was won by Machtey of second year General Art, the pool championship, second place in bowling and third place in the basketball tournament were won by Artsmen teams.

Much of the success of this organization is owed to Mr. William Longyear, honorary president, whose efforts are unceasing, to Edmond Powles, the active and competent president, assisted by a cabinet of live wires.

THE PALETTEERS

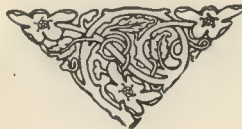

THE girls of this school have organized a club under the name of the "Paletteers." The purpose of this organization is to supplement the work of the school by securing lecturers from the art and business world, and to promote a spirit of good fellowship. It has accomplished its purpose beyond expectations. Within a single month the organization was able to announce 100% membership in the School of Fine and Applied Arts.

The Paletteers opened their program with an informal address given by Mr. Augustus Lukeman, the well-known sculptor of New York, who has been given the commission of carrying on the project at Stone Mountain, near Atlanta, Ga., which was begun by Gutzon Borglum. Mr. Lukeman gave the students a very comprehensive impression of the great Confederate Memorial and the tremendous scheme of decoration. The Paletteers succeeded in obtaining a very interesting program of speakers. Among those scheduled were Norman Rockwell, the well-known illustrator; Timothy Cole, the great etcher and engraver; Neysa McMein, cover illustrator; Tony Sarg, marionettes; Charles Chapman, illustrator; Charles Dana Gibson, artist and editor of "Life"; James Montgomery Flagg, pen and ink artist.

Apart from the work accomplished in the field of securing speakers, insignia were adopted. An insignia, representative of the organization, has been selected. It is symbolic of the name, having a P encrusted on a black palette with silver brushes.

NORMAL ART, 1926

T PRATT time will have its way. Our Normal Art Class so long intact, will soon be dismembered. Our parting is like the bursting of a great rocket, shooting a solid stream into the sky mid great clamor, but dropping down in a rain of embers, each falling in solitary place about the nation. After the flash has gone and the clamor has ceased, will come the undulating echoes—then silence! But each ember will continue to glow in its place.

As a family we have had our elders to guide us. They have not only extricated us from our fetters of ignorance, but have also given us part of themselves.

We shall not forget Mr. Peterson's subtle humor, Mrs. Shaurman's inspiring counsel, nor Miss Hyde's ceaseless guidance and vigilance. They have helped to lubricate the grinding of our hardest hours and our gratitude shall not be limited. We shall try to teach as they have taught and spread their light with us.

It seems infinitely longer than two years that we have dwelt together. We worked, strove, hoped, dreamed—and some have even wept together. And today we leave together, but with a wonderful experience burning in our hearts.

I have said that the embers of this rocket will have lighted in separate places about our country. They will not only continue to burn, but some of us will flare up, each from his respective place, and shoot a new stream in the sky. Our paths of gold will meet, some high, some low, but we shall meet.

Yet we shall not forget from whence our wisdom came. As a vine climbing higher remembers the earth from which it sprang—so shall we remember.

NORMAL ART, 1927

It is found—the missing link between the Normal Art Classes of 1926 and 1928. Last year we were not in existence. But, although we were called into being a bit late, due to the innovation of the three-year Teacher Training Course, nevertheless we have made a supreme endeavor to take our places as upper classmen. Recruits were enlisted from two sources, namely, the General Art Class and other accredited institutions.

However, we do not think that this has in any way prevented our class spirit from developing into the finest kind of friendly understanding and genuine co-operation. We really feel that under the able supervision of Miss Hyde we have been united into a single group with common interest and purpose.

In November, the Freshmen and Juniors gave a Normal Party in return for the enjoyable one given by the Seniors. Then it was that we made an important discovery.

For Miss Smith's benefit we will divide this situation into S's and R's. Stimulus: a set of Applied Art Books. Response: a speech by M. K. on poster work. We even begin to doubt that the instinct of vocalization can be modified.

We'd like to tell you more about our interesting classmates, but space is limited. We thoroughly appreciate our class, because of all the brightly colored bits of individuality which, when fitted together, make up that perfect mosaic called the Class of Nineteen Hundred and Twenty-Seven.

NORMAL ART, 1928

SEPTEMBER 28, 1925, is a day that will be long remembered in the history of Pratt Institute. On that day thirty-five students representing more than a dozen states, were chosen by fate—and by competitive examination—to represent the first class of the new Three Year Normal course. In the opening address to the class, Mr. Perry so impressed us with accounts of what former graduates have accomplished that we are happy and proud to be members of the first class destined to be thirty-three and one-third percent better than former graduates.

The first few days at school were most trying and discouraging. It seemed that our teachers wanted work that was almost impossible of accomplishment, and many anxious moments were spent in glancing at our neighbors' work in the hope that their efforts were worse than our own. In a few weeks, however, we were more at ease. It soon developed that while some were stronger than others in some courses, the great variety of subjects made it possible for each one to display some superior talent.

We find that the quality improved and the quantity increased with each week, thanks to our teachers, who have that wonderful faculty of getting a great deal accomplished without rushing or hurrying. When the second year begins we shall be anxious and ready to tackle the new problems offered us.

In after years when many of us have won fame and perhaps fortune, we will look back with pride on the day we entered as the first students of the new course, and hope to be remembered even as are the original twelve of the first class of Pratt Institute who had the courage and foresight to undertake a new course.

COSTUME ILLUSTRATION, 1926

CERTAINLY we have progressed a long way from that October day when we sidled into Miss Clark's class and slunk into the nearest seat, hoping that no one had noticed our entrance. What agony those first weeks were. Those of us who expected to turn out masterpieces immediately were deeply distressed over the strange assortment of dots and dashes in which Miss Everest so delighted. While others of us, less ambitious, found even those same dots and dashes quite beyond us. Now we flatter ourselves that we are the most congenial class in school and we are not without a noted record of achievements. The Costume Illustration dance which we gave was quite a success socially, though not financially. We also took part in the Wanamaker Fashion Shows with praiseworthy results.

As a class we have had romances by the dozen. Mil, Sally and Adele have enlivened our humdrum existence by a glowing description of some new Adonis every other week and we all await Bob's daily letter almost as eagerly as does Peg. We likewise remember the gallons of water consumed by Bee and Mable at the drinking fountain near the architects' room. But our three busy years at Pratt are nearly over and many of us are filled with regret at the thought of leaving our companions and fear at the thought of a hard-hearted world that may not fully appreciate our genius.

If Glad insists on continuing to gather research for the problems at the museum, we worry lest she become a permanent fixture there. By now she should be quite chummy with Azir Girges and King Tut's girl friends.

Spanish Fete

Libby has certainly shown herself to be a shining example to all Pratt students by the fact that she has missed so many matinees that her classmates have enjoyed at the "Met" (not meaning museum).

SMITH, RUTH A.

The Normal Art's loss was our gain when Ruth joined us last year, and we admit it. She has more dates than an oasis, and we marvel at the way she finds time to do her work.

STEVENS, ELIZABETH

The class statistician and private detective. If Elizabeth is at your elbow when you're embroidering a tale for the second time beware, for she will certainly notice where the two do not tally. She also has a habit, the despair of her associates, of getting her work in on the dot.

THURBER, HILDA

Freeport, Digby Co., Nova Scotia, Can.

Hil

Hilda thinks the "architecture" in Florida is pretty special and she certainly gives it quite a little thought. But that didn't keep her from turning in equally special work.

WELTON, HAZEL B.

We wonder what Dot does for lunch money when Hazel doesn't put in her appearance. We all know that she is the soul of generosity. More power to her!

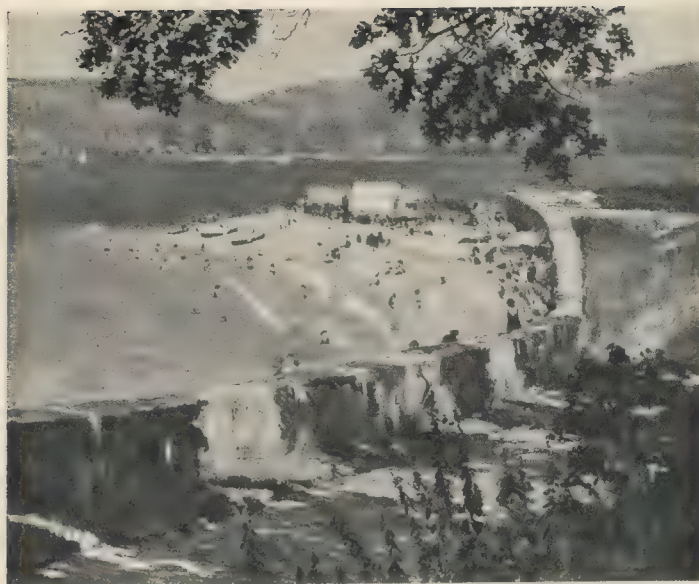

WANDERLUST

Wanderlust, wanderlust, wanderlust,
Oh! I want to be out again!
For the long, dusty road is a-calling,
And the stars; why must I remain?

Again it has come upon me,
That restless longing to rove,
Where the stars are silvery jewels
In the blue-black sky above.

Where the air is sweet and alluring,
And the whip-poor-will trills his sad song,
And the moon ship of silver is beck'ning,
Tho' the road may be dusty and long.

Painted by
DOROTHY M. COTHER

The woods in their inky darkness,
Even they are calling to me,
The gentle breeze in the tree-tops,
Oh, give me the life bold and free!

The gypsies dance 'round their bonfire
With tambourines—knowing no fear.
And afar, far off in the distance,
The white-crested waves beckon near.

Oh! give me the life of the rover,
The blood's tingling now in my veins!
The silvery moon lures me onward
To mysterious valleys and lanes.

Wanderlust, wanderlust, wanderlust,
Oh! I want to be out again!
For the long, dusty road is a-calling
And the stars; why must I remain?

Dear Joe College:

Well, Joe, how do you make the breaks since last you heard from "yours truthfully"? Guess it's about an even anno, as we used to say in dear old Greece, since the old home-grown Waterman's staggered in the general direction of your Welcome mat. Say, Joe, I hear that someone who knew his oats, to use the vulgar but expressive modern tongue, once laughingly remarked in passing, "Time flies," or words to that defect! Ain't it the truth? Gosh, don't it run you ragged how that ole gyp, Time, ankles off with the loving cup without half trying?

Well, Joe, I am still doing my bit towards spreading little rays of cheer and sunshine among the dear old playmates of Costume II. Oh, boy! When I think how carefree I was before I hit "The Sidewalks of New York"! (Don't take me literally.) When, with eyes filled with tears and soft coal, I consider how much time I once had in which to disport myself with the jolly little friends of my youth, I feel so low I could wear a high silk hat and walk under a duck without touching. Just try that on your vacuum cleaner! Yes, mental indigestion is liable to be the result of trying to figger when you'll have time to slip the "home ties" the weekly request for more extensive financial backing!

You mustn't forget our big Social Success, the dance, held in the gym, proclaimed 100% by all the "social lions" what knows! Of course, we reluctantly accepted a few prizes at the Wanamaker Fashion Show—but, gee, what's the use of telling you? You must have been keeping an eye on us; we're good!

Well, Joe, most of this has been about that class of '27, but if you don't think they're worth it, "you" and "dumb" is twins! And if this here now conflagration of dictionary don't rate a stutter, so's your old man!

Facetiously,

"SOPHIE PRATT."

HELLO everybody, class of '28 speaking!

Now that we thirty-five girls have become acquainted with each other and with almost every other class in our new Alma Mater we feel happy and much relieved.

Although we are an ambitious class we haven't done much as yet to prove our merits. However, we have cut out the cutest little Peter Rabbits and Humpty-Dumptys with the excellent advice of Miss Everest, and Miss White has been extremely patient with our futile attempts at Water Color. But ask Miss Herick about the fashion show at Wanamaker's and she will proudly tell you that one of our girls was favored with a second prize for the evening dress she designed and wore.

A few of us have attained a most unusual distinction for freshmen, namely, painting in oils. Fear not, upper classmen, our experiment in oil is not nearly so difficult as it may sound. We are painting a frieze we designed for the kindergarten room at Adelphi and are having lots of fun running back and forth and spilling paint.

It is interesting to note that the members of our class hail from Montreal and all points south to Virginia. Being a congenial crowd we get along famously, however, and take all jokes about our different pronunciation good-naturedly.

We like Pratt and are awfully glad we came here. Hoping to see you next year we are signing off. Good-night.

MAIN ENTRANCE

INTERIOR DESIGN, 1926

THINKING of commencement as a thing of the present, we look back with amazement at the time we have spent here. How quickly it has passed while we have been working toward our seemingly distant goal!

Our first recollection is that of our arrival at Pratt Institute in September, 1924, as a group of timid freshmen. How helpless we felt when we learned from Miss Everest what was expected of us; and how confused we were after Mr. Philip Pratt's first talk, "The Psychology of Dress"! We expected to hear of "Interior Decoration."

We found Mr. Perry had arranged a new program for us, a very interesting one, too. Half the class chose to work in crafts, while the rest began to work with Mr. Guptill, who initiated us into the mysteries of instrumental perspective, and although the mysteries still remain we are glad to have had his sound advice.

Although we have always had work aplenty, it did not succeed in subduing our natural social instinct. Nor did we neglect music, drama, or the dance. Daily we practiced our opera selections, rehearsed our plays and offered instructions in all the latest dancing steps. Nor did we ignore our wit and humor.

In June, when we bid good-bye to our school, it will be with a spirit of gratitude for the many privileges and advantages which have come to us through it. We are grateful for the lessons we have learned, the friendships we have formed and for the inspiration that it has given us to meet life.

INTERIOR DESIGN, 1927

WE often say that the first hundred years are the hardest; the first week was like traveling abroad without our Baedeker. When we had become more acquainted, we elected our class officers. The senior design class entertained us with a Hallowe'en party and dance. At Mr. Perry's reception a cordial welcome was extended to all. By this time most all of us had learned the requirements of our various teachers. Now the first ray of light began to burst forth. We still had hopes of emerging out of the dark ages. One morning Mr. Longyear announced that in the Spring (ah! beautiful Spring) we could bring some flowers, frogs, pollywogs, bugs, snakes, in fact, almost anything along that line; and sketch them in class. We lived in hopes.

Many important exhibitions have been held in the museums which we have attended. The light grew brighter and we realized what it was all about. As we became more familiar with our work, classmates and faculty, we adopted the ease and knowing of the connoisseur.

Christmas vacation brought a change, a rest, and a joyous holiday. We started our New Year out ready for hard work.

The light has grown brighter. We have partly emerged from the darkness. Keeping our Pratt motto in mind we will find that there is sunshine after all and the first hundred years may not be the hardest.

JEWELRY

OOD MORNING, everybody," Mr. Hamman looks at the clock. "Well, I had a hard time getting in from Ronkonkoma this morning."

Mrs. Aldrich speaks up. "Why, Mr. Hamman, haven't they cleared the roads in Ronkonkoma yet? Cranford roads were all cleared before midnight."

Miss Tinsman whispers something to Elizabeth. "Sh-h, there's a reason. She is the mayor's wife."

We are all working very hard when we hear someone say, "File that ring down some more, Helen, or he won't be able to lift his hand." Mr. Hamman adds his favorite expression, "File it like a lady, of course."

It is drawing near lunch time and we are afraid Miss Leighton's fish will jump right into that aqua—marine and we will lose our lunch.

The bell at last!

SCHOOL OF HOUSEHOLD SCIENCE AND ARTS

FREDERIC W. HOWE, *Director*

This School offers training in two distinct lines of work. Its courses are planned to meet the needs of those who wish to become specialized workers in the trade or professional world as dietitians, institutional workers, housekeepers, matrons, costume designers, dressmakers, or milliners; and those who wish training for effective home-making or in any one of the varied subjects relating to the home.

The courses are intensive in scope and character and are thoroughly practical, theory being interwoven with practice. They are largely flexible as to time of entrance, as much of the teaching is on an individual basis, and the work is designed to meet individual needs and objectives.

In cooking class they taught us
Principles of cookery,
And Miss Perkins tried to make us
Good cooks, like we ought to be.

Then Miss Feeney took us over,
Taught us diets clean and neat;
Baby formulas were offered
For us, when we have their need.

Every Monday we would scamper
For the Practice House to see,
With dust mops and other cleaners,
Who best could polish 223!

Then we went to our Miss Bartlett,
With her Acet-Aldehydes,
And glycerols and fatty acids,
That made us want to cry.

And we studied hydro-carbons,
The technique of the lab,
Till we nearly blew the place up,
And drove the teacher mad.

Every day some one did hasten
To the lunch room to prepare
Recipes which Mrs. Dorsey
Knew would come out fair and square.

But how flat those muffins and those biscuits
At times would seem to be,
But Mrs. Dorsey, with a sweet smile,
Said, "Try again and we shall see."

How Miss Perkins tried to teach us
About the foods we ate,
How they grew and were transported
Right up to our own back gate!

SENIOR DIETETICS

LOSE your eyes and let your mind wander back to September, 1924. You can see a group of girls showing signs of great emotion. This is the class of Future Dietitians, who are about to take their entrance exam at Pratt.

Soon traditional events followed one another in fast succession. The Faculty reception, Senior Class Tea and Founders' Day. All too soon Spring appeared—we felt as though we had been at Pratt for ages. Menus, calories, ionization become ordinary words in our vocabulary. Notices to see Miss Holloway become more frequent and gymnasium easier to stay away from!

Finally the time was right at hand for parting. It really was a big responsibility to go out and do your Student Training.

The first of October found us back on the job. Who can remember that day without a little tight feeling in her throat. Very soon, though, we were back in the tempo school days and history seemed to repeat itself. Only now we were Seniors and had many, many more responsibilities.

The second year was fast in passing, with much more work than it seemed possible to accomplish.

Two years—730 days—a time all too short to look back upon—hard times and good times—coupled with glorious friendships. Let us hope that the things we have learned and the friendships we have made will always stand in good stead.

INSTITUTIONAL MANAGEMENT

On ye twenty-second day of September in ye nineteen hundred and twenty-fifth year of our Lord, this famous class of Institutional Warriors entered into Ye Halls of Learning of Ye Pratt Institute. The aim of this aforesaid class was to learn—to learn to manage Institutions of various sizes and natures. Though some have since joined our ranks and several have dropped by ye wayside, we fight to the finish with Ye Goodly number of twenty-one.

Into our paths have been thrust ye big bug-a-boos such as Ye Chemistry, Ye Bacteriology, Ye Cooking, and many other dragons of like character. But all have been conquered with more or less effort on the parts of ye individual warriors.

In ye First term were ye get-acquainted parties at which some of our ranks were quite seriously wounded by ye arrows sent by members of ye opposite sex. During Second term ye warriors attempted to show Madame Dorsey how ye lunchroom should be run. Some have even become so efficient as to be able to make good muffins without any eggs. And others feel themselves capable enough to hire out as somebody's cook.

So in June, we will go out into Ye Universe to run it a little better than anyone else. All in all Ye Warriors have got much out of the struggle, both in worldly knowledge and good-natured fun.

HOMEMAKERS

VERY other course in the Institute was well under way when the Homemakers assembled on October first and were presented to the instructors of the Department. The impression of quiet activity was such that we felt that idleness had no place in the Pratt curriculum. Our schedule confirmed this belief and without delay we began cooking, budgeting, scrubbing, laundering and houseplanning. We found that we could make cakes we could eat, dresses we were willing to wear and hats that fit us.

Part of the instruction during this term that has promise of great benefit was a course in Arts and Crafts given by Miss Webb. This course includes wool embroidery, lamp shade making, weaving, furniture decoration and batik.

Under the competent leadership of Miss Condit we have approached with confidence both calories and accounts.

Kitchen A, the dominion of the cheerful Mrs. Covington, has always been a favorite classroom.

Our social calendar has not been as crowded as those of the other schools, but we have had several opportunities to become better acquainted with the faculty and the students. On February ninth we served tea in the Practice House to a group of visitors from the Home Economic Department of the Brooklyn Institute.

Only a few words may be engraved on our certificates but we feel that much more will be revealed in the equanimity of our homes.

COSTUME DESIGN, 1926

THE opening of school in September was a glorious reunion for most of us—at least the fortunate ones who completed dressmaking last year. Somehow we all felt like best friends and so wise compared to the newcomers. However, our first arrival at Pratt was not too remote to appreciate the feelings of our new members.

Having been taught with the characteristic thoroughness of Pratt the vast difference between roaming Elysian fields of leisure and being true to your work, we settled down to our labors with much enthusiasm.

When the new Home Economics Club was formed we were very eager to become members. The initial tea was a huge success. Our next social venture was our dance in the gym January 30th. Everyone declared she had a perfectly marvelous time.

Fresh hopes and eager action intermingled for next on our program was the Wanamaker Fashion Show. We designed and made thirty dresses and carried off two first prizes (twenty-five dollars); one second (fifteen dollars), and two third (ten dollars).

As the days fly by faster and faster we begin to realize that we are approaching the threshold. The time spent at Pratt has meant a great deal to us and will be more appreciated as time goes on. We take with us memories of all the good times we have enjoyed, and the friendships made and leave in our wake a fondness for our Alma Mater.

TRADE MILLINERY

CLASSES started on September 23rd, 1925. A group of girls, their true selves hiding behind masks of awe, shyness and timidity, gathered. It needed but a few days for these masks to melt in the warm sincerity of each to each.

Expecting to find a severe little woman as our instructor, what was our great joy to find Mrs. Garrett, calm, loving and willing. We all took to her as one does take to anyone so charming.

Soon the entire class arranged a little party together. We all had lunch and then went to a costume play. Many little parties such as these followed. Truly things have become so interesting that we dread the coming of the close of school. Never before has work been so cheerfully accomplished.

PRATT FACADE

TRADE DRESSMAKING

IN September twenty-third, girls from all over the country (even Florida and Wisconsin) came to Pratt to take their entrance examinations. The next day, almost all of these girls were on hand, and for several days the one question was, "Where do you live?" "I'm from Podunk!" In this way we girls soon became acquainted and often discovered that we had mutual friends in the old home town.

In October, several more girls joined our class, and they have been coming in the first of each month since then. Early in the term the faculty gave a tea for all the H. S. & A. students. At this informal gathering, the Dressmaking students had a chance to meet the faculty and the girls of the other H. S. & A. classes.

On Monday afternoons during the first term there were informal dances in the Recreation Hall. These dances were enjoyed as it gave us a chance to meet some of the Pratt men!

After the Christmas vacation the girls came back to school ready to work for the Wanamaker Fashion Show, which was held on February seventeenth. The show was a great success and we certainly were proud of our girls who won prizes.

Lincoln's birthday was not a holiday at Pratt but the girls didn't mind as it was Alumni Day and many of the old graduates were back. In the afternoon the faculty gave a tea for the students and Alumni. Work went on in earnest after the Spring vacation and we have worked hard in the hope of success and pleasure to come.

PRATT INSTITUTE FREE LIBRARY AND SCHOOL OF LIBRARY SCIENCE

EDWARD F. STEVENS

The Pratt Institute Free Library entered into the Founder's purpose for Pratt Institute, and had its beginning with the opening of Pratt Institute itself. The Library was not ready for the public, however, until the first of the following year, opening its doors on the ground floor of the Main Building January 2, 1888. Two years thereafter, feeling the necessity of trained assistants, Miss Healy, the first librarian, established a class in cataloging which developed into the present School of Library Science. The existing Library Building was completed in May, 1896, and dedicated with formal ceremony on May 26th, so this spring the Library observes the 30th anniversary of its existence in a building of its own. The Children's Porch was added in 1912, as a special entrance looking out upon the Library Grounds.

THE TRIP

THOUGH examinations were before and behind us to the very last minute, we had enthusiasm enough left, after they were over, to face the Spring Trip. Even a student who was disposed to stay at home was swept from her feet and packed off. So away we all went, with glamor upon us, for there is no ground like strange ground, and no wind like the wind that blows us to places that are new.

We traveled like gypsies, appearing in a city one day and disappearing the next. We told no fortunes as we went, but fortune found us, for we found ourselves. It seemed as if the books we came upon were gypsies too, for everywhere we seemed to find the very volumes we had left at Pratt, so that in every library we felt at home, with old friends looking at us from new shelves.

Everywhere we went, we found pleasure, each of us in her own way, but there was a charm about Vassar that envelops us like a perfume, even now. It has at once an old-world look yet modern airiness and up-to-dateness, very comforting. In a room that seemed, by firelight, centuries old, except for a Steinway Grand that the shadows transformed into a spinet, the library students danced a while, only their modern clothes making them seem unreal there. One of them sang to us, with a voice vibrant and lovely, "Swing low, sweet Chariot," and all that was new swung low, and all that was old and strange swung high, so that the new world seemed the old, or the old world seemed calling to the new.

The library is more like a church than a library. The strange thing about this trip is that everything one sees is like what it is not! The moment we stepped into the library at Vassar, we faced a stained glass window with a touch of royal purple, and a way of shining that made us think of chapel aisles. This library hasn't an academic air, but is a place where books of all kinds seem at home—not shelved in splendor, with ceilings too lofty for ordinary folk to walk comfortably under. It says, "Come in." It says "Stay." And the sunlight, through the plain glass window, makes the building bright, but through the stained window it comes with a grace, with a rush of color, with a sudden charm that is like an unseen kindness, welcoming you in.

No library we saw is like any other. The State Library at Albany is a mind. Vassar is a heart. Cornell it heart and mind. All the libraries put together are a soul; the librarians are part of it. And all the kindness that met us everywhere belonged to the books and the beauty that we saw.

For more than books waited for us. We came upon a river, mad and lovely, dashing itself against a black bridge. At Ithaca, we climbed wild hills, crossed a bridge that shook under us, and from that and from the hills watched a torrent fling itself into a valley of rocks and woods. And we knew in our hearts that though it would be splendid to be a book, it would be better to be a river, and that, after all, no book can ever give in words the beauty of a torrent or the understanding of a hill.

Yet when we went into the vault at Cornell, and took in our hands books old and beautiful, they were like children that we held, children that were ours, as the hills were ours. On the trip, for the first time, we felt that the library world belonged to us. Before, during the course, it had been a world we drew near, to study from without, but the trip made it ours.

There is not time or space to do justice to the trip, any of it. But not the least of it was going thirty miles and back by bus, to see a library full of light and of a certain air of irresponsibility that made it seem a place where books held carnival—the librarian may have been responsible for that, for he had a humorous way among them, as if to be with them amused and pleased him, as if he played there, as if even a serious book could be diverting, according to one's mood. And in a huge hall with classic pillars, in a lovely half-circle, we heard an organ playing. Five chords—and then it stopped. So we remembered the pillars, and imagine the music.

Too soon, on a day that bade us keep on traveling, we came back to Brooklyn, to travel no more together. But we brought back something with us. We knew each other better than when we started, we knew Miss Rathbone better, knew the book-world better, and the library each wanted to be in became definite in the mind of each, whereas before it had only been shadowy. Some of us felt that the trip had steadied us, made us find our bearings, as nothing else could have. Others felt that there could be nothing better than to be a library gypsy, going fast from place to place, finding books and books forever, finding torrents, finding hills, and that to stay long anywhere would be a mistaken thing. But that, perhaps, is because in the world itself one cannot stay.

The books stay. Patient on their shelves, or in the dark vaults that hide, in order to preserve, their beauty, the loveliest of them wait for other traveling students, in other years, to find them. And the hills wait for other feet, and the torrents will be there for other eyes, and there will be kindness always waiting, too, for library people coming and going. But we can never go again, as we went, the twenty-seven of us, and that is the only hard thing, the only sad thing, from beginning to end.

A. H.

THE LIBRARY LAMB

The library lamb began in September
 To learn as much as a lamb can remember,
 Meek as a seraph, shy as a colt;
 It sternly stifled an impulse to bolt,
 Frowned on a freakish desire to frisk,
 And worked in a manner steady yet brisk.
 "See, see how solemn I really am!
 And so they think!" said the library lamb.
 Yet, later on, at the Fall reception,
 It was gay and festive beyond conception—
 In diverse colors gallantly dressed,
 It frolicked lightly from guest to guest,
 Till all of them said, "How smiling and calm
 Is the gamesome life of a library lamb!
 So free!" they said—but they didn't oughter,
 They little guessed that it went to the slaughter!
 With a competent smile and a deadly fear,
 It faced exams at the end of the year,
 Weathered them bravely, then packed its grip
 To hurry away on the library trip,
 Saw distant glories, and came back, cheered,
 To practical work, which it first called "weird."
 Till it learned to laugh as it toiled away,
 And almost looked on its work as play.
 Little by little it changed its tune,
 And frisked its way to the end of June.
 Said the Library Course "What a bogey I am!"
 "Oh, not so bad!" said the Library Lamb.

Hadn't any use for prigs.

"If I'm to be happy,
Make it right snappy,"
Said Elizabeth Wiley Griggs.

HAYNES, FRANCES

Darien, Ga.

Frances has a pretty wit,
And everyone is glad of it.
She's whimsical toward life a bit,
Yet sees the sober side of it.
There's this to say: When all is told—
Our Frances has a heart of gold.

HENDERSON, JANE

Brockville, Ont., Can.

Janie's a darling, as anyone can see,
She's broad, but she's British with a very big B.
And she's true to the best
In herself and you and me.

HERRING, REBECCA

Clinton, N. C.

From the South comes our own Becky Herring,
Toward the weather she's always forbearing.
We like her slow drawl,
Pretty manners and all,—
I'll stop, lest she think me too daring.

HUESTIS, ANNIE CAMPBELL

178 St. James Place, Brooklyn, N. Y.

Associate Editor

Ann Huestis is Editorial Representative,
An honor she thinks is most tentative.
She will wear her hat,
And ignore this and that,
But of liking her that's not preventative.

KINLOCH, LUCY

Cliffside, Vancouver Island, B. C.

A saying of Lucy Kinloch's.
Was, "I never can master Gov. Docs.
'Twasn't Scotch education
To learn much of your nation—
I know less of it when the class talks."

LEWIS, LILLIAN

Hamilton, N. Y.

When Betty gave her seminar
She talked so very fast,
She had not time enough to wink
Or breathe enough to last!
Yet everyone regretted when
Her breathless time was passed.

LOCKIN, CLARA LOUISE

Aurelia, Iowa

Class Secretary-Treasurer

Her name was Lockin, but she said, "Please,
I'd rather have you call me Clara Louise."
But there was no one that I could find
Who called her anything else but kind.

MOHN, ANNA

76 St. James Place, Brooklyn, N. Y.

A certain young lady called Mohn,
Said, "My moments are seldom my own."
Yet she tried with much labor
To help out her neighbor,
So nobody let her alone.

NAYLOR, LEONORE

Pikesville, Md.

Class President

When Leonore is singing,
It seems as if the Spring
Drew near with all its music
And every tender thing.
Voices that we have heard before
Seem singing still, with Leonore.

OWEN, ANNE

Des Moines, Iowa

Now there is a damsel called Owen,
About whom I must write a poem.
When she stands up, she's tall,
When she sits down, she's small,
And I think now I'd better be goin'!

REINER, LUCILE

Kalona, Iowa

I wish I smiled as does Lucile,
With friendly warmth that one can feel.
I wish I had her pretty way
Of making all the world seem gay.

ROTHMALER, ERNITA

197 Rugby Road, Brooklyn, N. Y.

Here's a face that's grave and wise,
But well knows how to smile,
And, when it does, we'd follow her
For many a weary mile.
For such a friendly look as hers,
We'd cross the hardest style.

SCOTT, ALICE

417 Fifth Ave., S. W., Rochester, Minn.

There's a goodness in our Alice
That would shine in hut or palace;
She has not an ounce of malice,
Though all fell, she'd stand alone.
And than this there's nothing truer,
Though there's much that's coming to her,
Alice seeketh not her own.

WIGHT, LORENE

Gibbon, Neb.

There is a young person called Wight,
Whose smile is exceedingly bright;
We love her sweet ways —
On the hardest of days
She turns all her tasks to delight.

WILLIAMS, ALVIRA

Mrs. S. C. Williams, Berryville, Clarke Co., Va.

Tiny, dainty, little Willie,
Wise and gentle, never silly;
Fame she'll attain,
For us she'll remain
Tiny, dainty, little Willie.

WOOLSEY, JANETTE

Livingston Manor, N. Y.

A gay little girl called Janette,
Has a friendliness none can forget.
She's smiling and wise
'Neath the greyest of skies;
Good fortune will shine on her yet.

SOCIAL

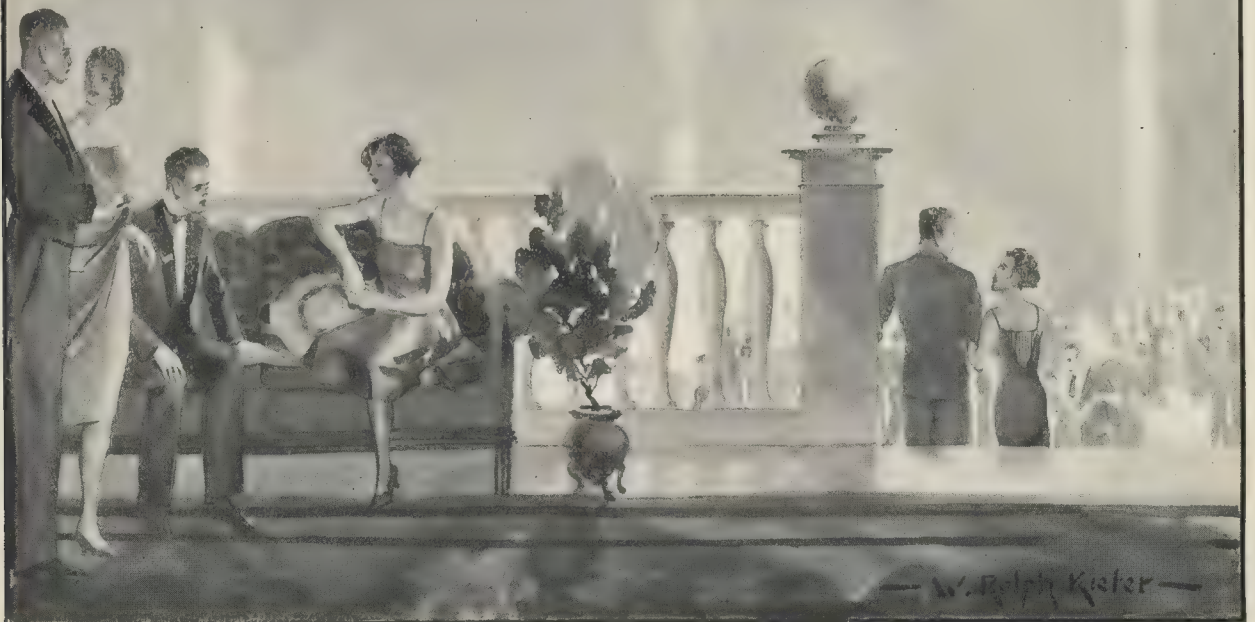

When we consider the activities of Pratt Institute we think primarily of work and hard work, too, but there are numerous forms of recreation for those who are socially inclined.

Before the invasion of the Cafeteria, the Recreation Hall was the center of attraction with dances and parties given by the Sectional Clubs and individual classes, while the Casino is the scene of most of the important dances of the year.

Of course, athletics are of interest to everyone, as the attendance at basketball, soccer and track will testify and for informal good times the Women's Club and the Men's Club are always in great demand.

Through the efforts of the Paletteers and the Artsmen the students have enjoyed talks by a number of men prominent in the art world.

S. E. TEMPLEMAN

THE ARTSMEN GYPSY DANCE

THE Gypsy Dance! What weird impressions those words conjure up; of camp fires and swinging kettles, and brown-faced maids and men in picturesque costume! But who would expect to find Pratt Institute turned into a Gypsy Camp? I wouldn't have believed that such could be the case if I hadn't seen it with my own eyes.

Most everyone came in some kind of a gypsy rig, and those who were too civilized to come in hired or home-made costume, were furnished with same at the door.

The Collegians, who furnished the music, were as much at home in this atmosphere as though they had been playing for their gypsy comrades all their lives.

But all good things must come to an end some time or other, and so at twelve o'clock the guests departed, the fires died down and the kettles ceased to boil, and the once hilarious Gypsy Camp became again just "our old Gym."

THE ARCHITECTS' DANCE

THE Architects' dance was, as usual, a very successful affair. It goes without saying that the music, furnished by the Collegians, made everyone feel real peppy. In fact, so lively was the pace that all the patrons and patronesses, unable to resist the twang of the banjo, and the howling of the saxophone, joined in and danced "the livelong night."

As the Casino was being overhauled, or rather renovated, the dance was held in the "gym." But who would have recognized it after the Architects finished with it? This is a compliment, not a slam. It was so prettily decorated that one would think a magic wand had been used, rather than Architects' student labor.

But there was one sad event of the evening. I hate to tell it, but I must, so here goes. The closing bell rang at twelve o'clock, and with woebegone faces, and feet "sore" only because they couldn't dance for another hour or two, the guests finally departed, taking with them delightful memories of the Architects' Dance of nineteen twenty-five.

STUDENT COUNCIL MOVIE AND DANCE

HE entertainment given on Friday evening, May twenty-first, under the auspices of the Student Council for the benefit of the summer playground was fully equal to productions seen in professional moving picture theatres.

This activity was formerly under the direction of the Neighborhood Association but for the past two years has been directed by the Student Council.

Vasantasena, designed and presented by the students of the School of Fine and Applied Arts, was just as interesting as when it was given two years ago. At that time the production received complimentary tributes from professional moving picture producers.

It is said that a picture to be successful must make one wish to be in the places shown. The French travelogue, photographed by Mr. and Mrs. Philip Pratt, was that kind of a picture. It made one long to travel.

Then there was a comedy (?) which took one back to war times. That is—it was labeled "Comedy" and in the sense that "laughter is next to tears" it might not be a misnomer.

The snapshots of Pratt Institute were the "hit" of the evening. To "see ourself as others see us," though not always satisfactory, is always desired and the motion pictures of the various departments gave many the opportunity longed for. Everyone appreciated the work of Mr. Philip Pratt in making us so proud of our friends—and ourselves!

After the performance, there were no doubt some who contemplated changing their residence to Hollywood.

The singing, clog dancing and tumbling made one feel there was nothing which Pratt students could not do.

And the sleight of hand performance! Yes, of course they were "tricks" but seemed so real! Mr. Valentine is following closely in the steps of Thurston, the magician.

The evening's entertainment was followed by a dance in the Gymnasium. The Gymnasium looked unusually attractive with the decorations which had been arranged for the senior dance of the Industrial Mechanical Engineering class and were greatly appreciated by the members of the Student Council and their guests. The music of the orchestra was particularly enjoyed. The committee reported that a very good amount was raised for the summer playground.

PRATTONIA DANCE

YOU, undoubtedly, all know about the Prattonia Dance. If you were not there you missed one of the biggest dances of the year. This dance was held on October thirtieth, in the Gymnasium, with the Collegians furnishing the music. Everyone, from the students to the instructors, felt that the evening could not have been more enjoyable. This, of course, was due to the untiring efforts of the Prattonia Board and Staff who made the dance such a success that everyone was glad to have been there.

If you could have seen these poor mortals on that afternoon, struggling over the decorations, you would have appreciated fully their efforts to give the supporters of Prattonia a delightful place in which to dance.

The decorations were arranged so as to give the gymnasium the appearance of a huge tent. This was easier said than done, but these hard workers accomplished their task, and set a good example for future decorators.

After dancing for a while everyone was bound to become thirsty, and so delicious punch was sold at such a small price that it wouldn't break anyone to buy all they could drink, and more.

We want to thank everyone who helped boost this dance for their support and cooperation. Three cheers for Prattonia!!!

THE REST HOUSE

MISS HALE

THE REST HOUSE"—could anything sound nicer? Could anything *be* nicer? No. How many lonesome and homesick students its four walls have cared for! Miss Hale and Mrs. Hatch look after and cheer us and Billy Resthouse teases us.

Our Rest House is truly a place of rest, and with a miserable cold or headache we trot down and are put to bed and given a pill. Then the next night we're all ready for the dance! The Rest House is a precautionary measure, and no one regrets a day or night spent there.

Visitors are allowed and they always come in with all the "hot dope" on school.

The Rest House was closed June, 1918, as a war measure, being used for examining the Army and Navy Men from the Army and Navy Training Corps. It was re-opened under Miss Hale and Mrs. Hatch, November, 1919. It has accommodated over 2,000 students up to date.

GET-TOGETHER CLUB

THIS club, at the request of the students, was organized by Miss Middle-ditch and Miss Feeney in an effort to establish a common interest for the girls of all courses, in Fine Arts, Household Science and Arts and Library Schools. That they have accomplished.

The meetings, held at the Women's Club, have consisted of light entertainment followed by a talk.

At the first meeting Mr. Frederic Pratt regaled the members with stories of his travels. At another, Dr. Wm. E. Dodd told of conditions in Turkey. In February, Mr. Fred M. Chu, a student of the S. & T. School of Pratt Institute told of student activities in China. At the March meeting, Mrs. Charles S. Parmelee told of the Big Sister movement. A later meeting was entertained by a group of Philippine students from International House.

The meeting in May, out-of-doors, gave members a chance for display of their skill in building camp fires and in toasting hot dogs.

Much of the success of the club is due to Miss Willa Campbell and her able assistants, who prepare the refreshments. Aside from their excellence these suppers help to promote sociability.

WOMEN'S CLUB

NINETEEN HUNDRED AND TWENTY-FIVE marks the twelfth year of service the Women's Club has given, a splendid record indeed! The work it has done has neither marred its beauty nor aged its spirit, but has rather endowed it with an atmosphere of continual cheerfulness and pleasantness, the echo of a thousand peals of girlish laughter.

Advancing with the times as all good clubs should, it has acquired a waffle iron and various other modern commodities, gifts of its friends at birthday time. It had a very hilarious time this birthday, as it entertained only the junior members (juniority determined by the length of one's skirt).

But nothing lives and moves without a guardian angel, and no one needs three guesses to know Mrs. Taylor is just that, besides being a very practical aid in all emergencies. Then, you know, of course, that no guardian angel exists without the assistance of cherubs and although cherubs are generally considered heavenly, this year's pair are better known as the "earthly twins," which is really a tribute to their humanity.

In conclusion—instead of looking back, we are going to look forward to hundreds and hundreds of happy, useful years, growing younger all the time.

THE KID'S PARTY

MRS. TAYLOR

THE MEN'S CLUB

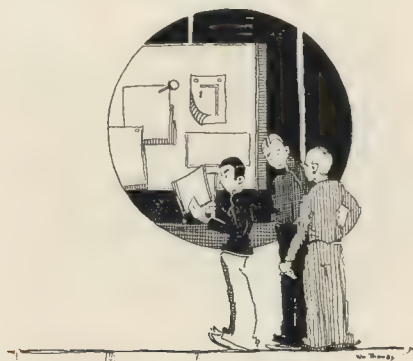

N ideal spot for recreation or study, always a warm welcome greets you at the club. The boys at the counter with their pleasant "Hello," or the friendly greeting of Julius tends to keep the true Pratt spirit ever present.

For sports there is no finer place (good, clean sport, too)—Pool and bowling are the most popular forms of diversion, although many of the more thoughtful type take to chess and checkers to arouse the depths of their mentality.

The P. I. Lunch! Ah! There is a rare establishment controlled by fine fellows who have done so much to satisfy that everlasting desire to partake of good grub.

Last but not least is the club office. One of the busiest places in the Institute, always jammed with students' photos, Boy Scout equipment, Mr. Snowden, etc., etc.

We feel that the club is one of the assets that helps to bring Pratt so close to us.

THE STUDENT COUNCIL

THE Student Council, representing the members of all schools, is organized with the object of promoting and assisting all student activities—social, and recreative—and of developing and maintaining the interest of the students in these activities. The membership of the Council consists of all class presidents, student representatives, one each from the Athletic Association, the Men's Club, the Women's Club, and representatives from the faculty.

ATHLETICS

It is not the exclusive aim of Pratt Institute to train specialists in the various Science and Art courses, but its function is also to inspire and develop high standards of character and citizenship. As a factor in the production of these qualities Athletics ranks high. Athletics demands thought, effort, grit, self-control, they create concepts of team work, give a thorough discipline in standards of sportsmanship, and an opportunity to act out a spirit that will add to the moral tone of school life. Athletics likewise broaden social intercourse and stimulate democratic tendencies. More than any other phase of student life they promote loyalty and patriotism.

The opportunities presented to the students of Pratt Institute through organized Varsity and Inter-Class athletics is one, therefore, of real value, which is being appreciated every year by a large number of men. As these men graduate and become loyal Alumni of Pratt Institute, undoubtedly many will recall their athletic relationships as particular bright spots in their Institute life.

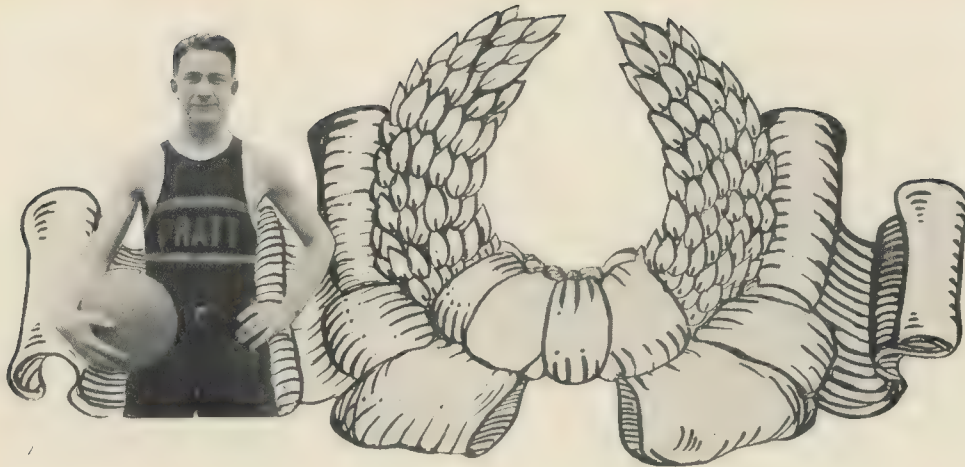

MR. D. WRIGHT

IN Nineteen Hundred Ten there came from the Springfield Y. M. C. A. College, where he had played football and captained the hockey team, to the Department of Physical Education for Men at Pratt Institute, Mr. Fred D. Wright. During fourteen years Mr. Wright has served the athletic interests of Pratt Men, Students and Alumni, with a purpose unselfish at all times.

ATHLETIC COUNCIL

REVIEW OF THE BASKETBALL SEASON

ALTHOUGH represented by one of the youngest and lightest teams in the history of the school, the Pratt basketball team of 1925-1926 had a most successful season. This success was achieved mainly through the spirit of co-operation in the squad and willingness of the men to dig in and give their best efforts at all times. Much credit is due Manager Francis and his assistants for the efficient manner in which they handled their duties and to Captain Longyear for his tactful and spirited leadership.

The loss of the entire first team of last year was felt less because of the ability of the remaining members of the squad. The five men who finally won the places on the team had played together throughout the previous season and as a result started off farther advanced in team work and knowledge of one another's game. This enabled the team to get off to a good start, for they won the first four games and although the schedule was one of the hardest of recent years they finished the season with a record of nine victories and five defeats.

The season opened with Cooper Union as our opponents and after a close first half, Pratt finally got started and rolled up a 34 to 16 victory.

St. Francis was our next opponent. A large crowd turned out and after a hard fought, close game, we finally won out, 20-17. An early lead of 10-1, rolled up in the first five minutes was responsible for the victory.

The schedule was renewed after vacation with Cathedral College. They came with a record of six winnings and one loss, losing only to the strong St. John's College team by a close score. Pratt flashed one of the best exhibitions of the season and captured the game, 36-18.

A mid-week game with Webb Institute gave every member of the squad a chance. Twelve men got into the game, which was won by Pratt, 38-24.

Pratt suffered its first defeat of the season at the hands of St. John's College. St. John's was represented by its former Prep team which won the Eastern Championship in 1923. The Pratt team put up a hard fight, but long, spectacular shooting gave St. John's a 34-21 victory.

The Crescent A. C. was met for the first time in three years and they administered the usual medicine. The Pratt team played good basketball, outscoring the Crescents in the second half. The game ended Crescent A. C. 34, Pratt 23.

The first game of our trip was played with Rensselaer Poly. The team was decidedly off, giving the poorest exhibition of the season. Rensselaer played a fast cutting and clever passing game and more than avenged the 33-29 defeat handed them last year. The final score was 44-18.

The team next journeyed to Hartford to play Trinity College. The Connecticut Alumni turned out in full force, being represented by a cheering section of 300. The score was tied seven times during the game, which ended 28-26 in our favor. It is indeed a pleasure to play before such a loyal group of Alumni.

Worcester Tech was our next victim, the game ending 28-19 in our favor. Pratt took an early lead which they held until the middle of the second half. At this point Worcester rallied and tied the score, but Pratt had the necessary reserve and won out.

The New York Aggies, usually an easy opponent, was responsible for the biggest upset of the season. Poor passing, inability to find the basket and overconfidence were responsible for the defeat. Final score, 24-18.

We were fortunate in being able to schedule Mass. Inst. of Tech. as our next opponent. They came represented by a heavy, well coached team and a fast, hard fought game resulted. The Pratt team, however, showed great improvement over its preceding effort and scored a well earned 28-20 victory.

The return game with Trinity College was almost a repetition of the game played at Hartford earlier in the season. The lead alternated many times during the game, which was featured by the strong defense of the Trinity team. Long shots during the closing minutes gave Pratt a 24-22 victory.

The team next journeyed to the Brooklyn Poly court. Poly had a record of ten straight wins and were confident of adding Pratt to the list. They accomplished this, but only after one of the most exciting and best played games of the season. The final score was 27-24. Poly winning out through a last minute rally.

The season ended with the Alumni game, which was played in our new gym. The Alumni, represented by last year's team intact, played a great game, but were defeated by the score of 36-35 after a stirring battle.

VARSITY BASEBALL

ONLY three members were available from last year's team around whom a team had to be built. Capt. McKee behind the plate, Fred Tanner at first base and McDonnough in the outfield were the veterans left. However, plenty of good infield and outfield material was available to fill the vacancies in these departments and the main problem centered around the developing of pitching material to replace last year's mainstay, Fred Renner. Much credit is due Manager Gray for his success in arranging the schedule and carrying out other duties in connection with his position.

The season opened with Cooper Union at our own field. The game was close for five innings, with Pratt leading 2-1. However, at this point the team seemed to find itself and heavy hitting combined with loose playing by our opponents brought the final score 21 to 2. The fielding and hitting of the entire Pratt team featured the game.

The team next journeyed to Philadelphia to meet Drexel Institute, and although the day was better suited for football, a close and exciting game resulted. Drexel started with a rush and by the seventh inning were leading by 7 to 1. At this point Pratt rallied, scoring one run in the seventh, three in the eighth and two in the ninth, tying the score. No more scoring was done till the eleventh when Pratt scored one run, only to have Drexel come through with two and win the game, 9 to 8. The hitting of Tanner and Dunn and the all round playing of McKee featured the game.

Webb Institute was our next victim in a very one-sided game, which ended 22 to 0. Webb played a loose game, errors being responsible for many of the Pratt runs.

The Alumni with many of last year's players in the line-up, were next met. The Varsity played their best game of the season, timely hitting and good pitching backed by perfect support were responsible for a 15 to 1 victory.

The lights from the parlour and kitchen shone out
Through the blinds and the windows and bars;
And high overhead and all moving about,
There were thousands of millions of stars.
There ne'er were such thousands of leaves on a tree,
Nor of people in church or the Park,
As the crowds of the stars that looked down upon me,
And that glittered and winked in the dark.

R. L. STEVENSON.

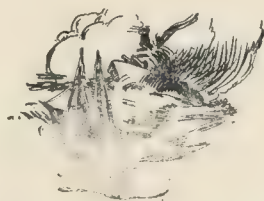

SWIMMING

Schmidt, Price, Foster, Campkin, Hofmann.

FOR the second time Chemistry repeated their performance of last year and carried off the Swimming Championship. Art was their strongest contender and Chemistry was fortunate in meeting them first so that for the rest there was nothing but plain sailing.

The team was ably captained by Price of last year's squad, and managed by Hoffman, who fulfilled the position very well.

LIFE SAVING

Entlich, Casmody, Rice, Duane, Schmidt, Moxon.

THIS year the life saving class showed more than ordinary interest, so that although the class was not unusually large, a great deal of good work was accomplished. Schmidt, who was one of the hardest workers of last year, was in charge of the squad and its success was due in a large measure to his efforts.

CHEMISTRY SOCCER CHAMPS

Hoffmann, Gerardi, Cheng, Gill, Schweinsberg, Lawrence, Koundouris, Ho, Holmes, Fleming, Abernethy, Jacobson, Knappman, Burwell.

FOR the third time in succession the Chemistry team carried off the championship honors in soccer. Both the first and second years combined and the results were certainly gratifying—to Chemistry.

The feature of the team was the excellent combination displayed and the ability of the players to work with one another, everyone being unselfish and willing to pass the ball. Lawrence, who was last year's assistant manager, carried on the good work again this year and credit is due for the way in which the team was handled.

TRACK

Cline, Hokola, Ginsberg, Thomas, Powles, Riter, Rosenbaum

THE third consecutive year the Artsmen have won track with very little competition. The outstanding stars are Ginsberg, high score man for two years; Thomas, Hakola and Riter. Cline and Rosenbaum, the first year men of the team, did real well. The high jump record was broken by Thomas and Riter, five feet nine inches, old record, five feet five inches. Powles was the general track manager.

GIRLS' LIFE SAVING TEAM

OUR interest in life saving was born two years ago when Captain Scully spoke to us. Before long a class was assembled. Not many passed the first test. But under the instruction of Miss Jordan, then Miss Hegenberger and now Miss Sherwin, many have not only passed the senior test but have also become examiners.

ARCHITECTS' BASKETBALL TEAM

THE Architects' turned out the championship team of the inter-class basketball league. In the preliminary games, the Architects' were not considered as serious contenders, but they plugged hard and gathered strength as the season advanced. The team was composed of a majority of first year men and the outlook for a repetition of victory seems bright for the coming year.

ART POOL TEAM

Mortellito Strauss Ritter

THE Art team ran triumphantly through its schedule of six games and won the 1925-1926 pool championship. The I. M. E. I team were the runners-up, with the Architects' forming some active opposition.

The team consisting of Ritter, Mortellitto and Strauss came through with the unexpected and though some of the games were won by the closest of margins, the consistent work of the members decided the issue.

IN MEMORIAM

WITH sadness, Prattonia records the deaths of the following students during the current year. We will long cherish the memory of these friends for the sterling qualities they manifested during their stay at the school.

ACKNOWLEDGMENTS

IN compiling this volume, the Prattonia Board has been greatly assisted by many who have cheerfully lent their time and skill that it might be a fitting reminder of our days at Pratt.

It would be impossible to mention here all who have so generously contributed.

However, we do wish to thank in particular the following:

Mr. Charles Pratt and the General Faculty Committee who, by their never-failing interest and valuable aid, have made this book possible.

Mr. Walter Scott Perry, Mr. Edward F. Stevens, Mr. Samuel S. Edmands and Mr. Frederic W. Howe for their contributions and hearty co-operation.

The Secretaries and the Faculty Advisors of the four schools, for their interest in matters concerning Prattonia.

Mr. E. H. Whitney of the Gibbs Press, for his interest and advice in the printing of this book.

Mr. J. P. Roth of the Scientific Engraving Co., for the high quality engravings and his unfailing willingness to help.

Mr. H. J. Paul, for his patience and time in making the photographs used in this book.

Those other persons of the Institute who have lightened our work by their helpful suggestions and many contributions.

And last, but surely not least, the Class Representatives for their unceasing efforts to keep Prattonia before the Student Body. Their tasks were many—their rewards few.

—AN AID TO RAILWAY ENGINEER- ING AND PURCHASING OFFICIALS

Through the combined efforts of the Engineering and Production staffs of the various Companies listed on this page, and the E. A. LUNDY COMPANY, products of known merit are offered to the railroads.

These Companies have for years been specialists in their respective lines and through our organization, will work with the Engineering and Purchasing officials in developing materials and apparatus to meet the requirements of the railroads, by incorporating into such materials and apparatus, the ideas and suggestions of the railway men.

We would appreciate the opportunity of serving you in connection with your signal, electrical and telegraph requirements.

“THE COAL THAT SATISFIES”

To those Coal Users whom we have not had the pleasure of serving, we call attention to the following facts:

Our Plants are strategically located throughout Brooklyn and Queens and the reputation of this Company for fair dealing, quality and service, is one of long standing and has stood the test of many Coal Strikes and other trying periods.

We solicit your patronage.
